

# Plant Manager

Brunel is currently searching for a **Plant Manager** for direct hire with our automotive client located in **Kentucky**, just South of the Ohio border.

## Summary

- Vacancy number: PUB211255
- Market: Industry
- Branche: Automotive
- Area of Expertise: Engineering & Design
- hours per week: 50
- Education level: Other
- Closing date: Thursday, May 30, 2019

## Job description

We are looking for someone with an entrepreneurial spirit that is well organized and motivated who is a flexible team-player with a "hands-on" mentality. This plant is a 2-3 shift, non-union, Tier 2 to Tier 4 plant with approximately 100 employees.

## About you

The successful incumbent will have an automotive background with preference given to those with experience in aluminium and/or plastic automotive parts. Someone with a plastic or metal coatings automotive manufacturing background is desired. Must have previous professional and managerial experience within an automotive supplier industry as a factory or production manager.

### Key tasks:

- Overall operational responsibility for the US manufacturing facility
- Ensure compliance with occupational safety, quality, and environmental standards
- Implement operational and strategic goals with the existing team
- Develop and implement productivity and capacity-building measures
- Development of local management

## What we offer

Varied and challenging activities with excellent career development and promotion opportunities. A modern workplace and state-of-the-art technical equipment. This Plant Manager can expect an attractive salary package plus company car along-side a world-class benefits package.
