

# Occupational Physician

Our client is looking for an Occupational Physician to provide technical occupational health advice and support to enable asset teams to effectively manage critical health risks. The role involves ensuring alignment with the Group Health Strategy, maintaining focus on priority projects and supporting effective implementation by the assets. The successful candidate will be reporting to the Manager of Health & Hygiene. This is a key role in a diverse and global organization and a great opportunity to work alongside and network with a global team. This role will be based in Montreal.

## Summary

- Vacancy number: PUB211940
- Market: Oil, Gas & Mining
- Branche: Mining
- Area of Expertise: Health, Safety, Environmental & Quality
- hours per week: 40
- Education level: Professional Bachelor
- Closing date: Tuesday, May 28, 2019

## **Job description**

### **Responsibilities**

- Be a technical expert and support for site physicians – Americas, Europe & Africa including determination of fitness for work in complex cases, interpretation of complex results
- Provide Medical support to sites for major or technically challenging health incidents and issues and for complex occupational and non-occupational disability management
- Maintain & develop medical expertise within the regional network
- Participate/lead in Health reviews and audits
- Identify efficiencies and drive standardization across medical services and provide quality assurance to site clinics
- Analyze trends and collaborate with IH technical expert to ensure global health approach
- Offer strategic functional direction in collaboration with Regional Delivery team and in line with Group strategy
- Develop and support deployment of specific health initiatives according to work prioritization
- Support medical alignment with Industrial Hygiene, Safety and Regional Delivery team as well as with counterparts in Perth/Brisbane hub
- Ensure regional regulatory watch including participation in regional and international forums

## **About you**

### **Requirements**

- Board-certified or board-eligible in Occupational Medicine (preferred) or Preventive Medicine and Public Health
- At least 5 years of direct occupational health care experience (clinic and program development/deployment)
- Strong occupational health, team leadership, and organizational skills
- Experience in mining or similar heavy industry is preferred
- Knowledge and understanding of OSHA classification, HS Systems, standards and key risk management and assurance processes
- Critical thinking, team-orientation, cross-disciplinary/interdepartmental collaboration

- Excellent communication and interpersonal skills
- Written and oral fluency in both English and French will be a definite asset.
